1 Executive Summary

This report accompanies the submission of WISEWORK-C Newsletter #1, the first in a series of three cluster newsletters planned during the cluster period. The newsletter is part of the common communication and dissemination strategy for the WISEWORK-C and is produced as a collaborative effort in Working Group 3 – Communication and Dissemination, utilising the previously developed visual identity for the cluster, as detailed in the related deliverable: *Web Portal and Visual Identity* (M9).

2 Introduction & Background

The WISEWORK-C Cluster brings together five Horizon Europe projects committed to advancing mental and physical health in evolving work environments, responding to challenges posed by the green and digital transitions, post-pandemic shifts, and demographic change.

The first WISEWORK-C newsletter aims to provide a snapshot of the cluster's progress and engagement between January 2024 and May 2025, serving both internal and external audiences. It highlights key scientific and dissemination activities across the five Horizon Europe projects, showcases recent outputs, and announces upcoming events and opportunities. The newsletter is disseminated digitally via the cluster website, LinkedIn page, and partner communication channels.

This deliverable offers an overview of the development, design, scope, and content of the newsletter.

3 Format

The WISEWORK-C Newsletter #1 follows a digital-only format, aligned with the cluster's sustainability and accessibility goals. The layout is based on the cluster's visual identity (as described in Deliverable M9: *Web Portal and Visual Identity*), ensuring consistency across all communications.

The structure is designed to be visually engaging and easy to navigate, allowing readers to quickly scan for topics of interest. The layout includes headings, short paragraphs, embedded links, and visuals such as project logos and photos. The newsletter is created in a downloadable PDF format and hosted on the WISEWORK-C website. Additionally, the LinkedIn functionality will be used to disseminate the newsletter through the cluster and projects accounts given the growing number of followers on each of these channels.

4 Content

The newsletter includes the following sections:

- *Who we are* – An introduction to WISEWORK-C and its five member projects
- *What we've been up to* – Cluster highlights from January 2024 to May 2025, including cluster meetings, thematic workshops, and milestones
- *Projects Highlights* – Featuring one milestone or highlight from each WISEWORK-C project
- *Coming up* – A calendar of upcoming conferences, events, and scientific dissemination activities
- *Featured Publication* – Highlighting a recent publication from one of the WISEWORK-C projects
- *Latest Releases* – Recently published public-facing materials such as brochures and press releases

- *Job Opportunities* – Open positions in partner institutions
- *Stay in Touch* – Contact information and links to cluster communication platforms

5 Channels

The primary platform for distributing the WISEWORK-C Newsletter is the LinkedIn newsletter function, which allows direct engagement with followers of WISEWORK-C and its five member projects. This format supports broader visibility, real-time updates, and interaction with a growing network of researchers, practitioners, and policymakers interested in workplace health and innovation.

To complement the LinkedIn distribution, a PDF version of the newsletter will also be made available as a downloadable resource on the cluster website plus the websites of each participating project. This ensures accessibility across formats and offers an archival version suitable for referencing and wider dissemination through institutional and stakeholder channels.

Together, these channels contribute to WISEWORK-C's communication strategy by supporting accessible, timely, and collaborative sharing of progress and findings across the cluster.

6 Conclusion

Newsletter #1 marks the first joint communication milestone of WISEWORK-C during its implementation phase. It showcases the value of collaborative communication across projects and sets a consistent format for future issues.

By providing engaging, well-structured, and up-to-date information, the newsletter supports the cluster's goals of visibility, outreach, and cross-project learning. As individual projects begin to generate evidence and concrete results, upcoming editions will play a key role in communicating WISEWORK-C's findings and activities to wider audiences, including workplaces, researchers, practitioners, and policymakers.

The newsletter will continue to evolve based on feedback from partners and stakeholders, with the next issue planned for Q2 2026.
